# PUPU® POLE TOP EXTENSIONS

PUPU® Fiberglass Pole Top Extensions are used to extend the height of existing utility poles or replace damaged pole tops. These products possess all of the quality and features that make PUPU® the leading brand of fiberglass crossarms.

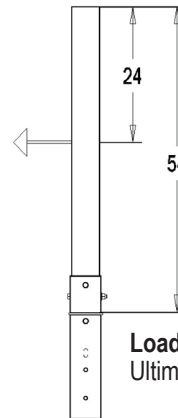

- Light weight, strong 5" X 5" fiberglass beams
- Adjustable, galvanized steel mounting bracket installs on pole diameters from 6" to 10"
- Outstanding UV protection with thermal-bonded SunGUARD® UV resistant coating
- Holes reinforced with TorqueGUARD™ bushings
- Sealed, UV resistant endcap
- Filled with closed cell rigid foam to exclude moisture and contaminants
- Brown or gray color available
- Can be field-drilled

## 54" EXTENSION STRENGTH TESTING:

- 5" X 5" fiberglass beam
- Galvanized structural steel bracket
- Attached to 6.625" steel pole with two 5/8" bolts
- Load applied 24" from tip in two directions
